PROFILE

UX/UI Product Designer designing enterprise platforms, internal operations tools, and client-facing digital products. Leads UX/UI strategy, design systems, and high-fidelity prototyping that connect user needs with engineering constraints and business goals. Builds interface architecture that supports complex workflows across multi-client product portfolios.

SKILLS

Technical Skills: AI assisted prototyping, Figma, Confluence, Adobe Suite, Zeplin, User-centered design, Wireframing, User flows, Design systems, Usability testing, Information architecture, Responsive design, Interaction design, Accessibility design, Stakeholder workshop facilitation, Design critique facilitation, A/B testing.

PROFESSIONAL EXPERIENCE

UX/UI Product Designer - Cafeto software

2022 - Present (4 Years) - Cali, Colombia (Remote)

Over this years, I participated in more than 12 different projects; here, I mention those I consider the most relevant.

DOQMIND Platform:

- **Feature Execution & Workflow Scaling:** Designed and launched 20+ core platform features, streamlining complex operational flows and eliminating overall user task friction.
- **Workflow Optimization & Error Reduction:** Redesigned the file upload and approval experience, boosting first-attempt task success rates by 30% to 40% while cutting validation errors.

DOQMIND Viewer:

- **Zero-to-One Product Architecture:** Architected a custom document viewer interface from scratch, integrating 30+ interactive toolsets into a unified, high-density layout.
- **Usability & Onboarding Efficiency:** Iterated post-launch designs based on user session tracking, accelerating task completion speed by 50% to 60% and drastically flattening the learning curve.

Omega Security:

- **Congestion Elimination & Biometric Access:** Integrated facial-recognition scanner workflows that eliminated peak-hour bottleneck entry queues for residential complexes with over 300 residents.
- **Logistics & Record Processing:** Digitalized manual paper-logging processes into automated digital entry forms:
- **Visitor Registration:** Cut average check-in time from 30 seconds to 10 seconds.
- **Package Intake:** Reduced package logging time from 45 seconds to 20 seconds.
- **Incident Reporting:** Streamlined manual incident reporting down from 5 minutes to 1 minute (an 80% operational time reduction).

Web & Dashboard Solutions (Legrand & CIAT):

- **E-Commerce & Digital Sales Channel (Legrand France):** Designed a public-facing catalog showcasing 50+ detailed products, establishing a direct-to-consumer sales channel that generated 250 direct transactions in its first month.
- **Cross-Border Data Visualization (CIAT):** Engineered an interactive dashboard unifying 30–40 country-specific indicators across 3 regions, delivering clear data visibility for enterprise decision-making.

Visual communication designer - Cafeto software

2017-2019 (2 years) Cali, Colombia

Led visual communication initiatives and end-to-end design assets for internal and external channels, later evolving into a UX/Product Design role.

- **High-Volume Visual Production:** Produced 500+ digital and print corporate design assets—including internal newsletters, communication boards, digital signage, social media banners, and targeted web graphics—maintaining strict brand alignment across all channels.
- **Cross-Functional Brand Support:** Served as the central design partner for HR, EHS (Environmental Health & Safety), and various internal teams to deliver targeted graphic solutions for recruitment drives, safety protocols, and company-wide initiatives.
- **Brand Identity & Sub-Branding Architecture:** Developed complete brand identity systems and visual guidelines from the ground up for the main company and its sub-entities, product lines, and digital platforms.

Visual communication lead - Bigjonan Studio

2016-2019 (3 years) Buenos Aires, Argentina

- **3D Spatial Design & High-Volume Pitching:** Concepted, modeled, and rendered 200+ custom exhibition stand proposals using specialized 3D software, delivering photorealistic spatial visualizations that drove high-value client acquisition across major industry expos (e.g., Oil & Gas).
- **Web Design, Lead Generation & Sales Conversion:** Designed and maintained the company website, capturing over 100 inbound leads and achieving a 20% pitch-to-sale conversion rate for custom stand construction.
- **Large-Format Pre-Press & Production:** Engineered and prepped high-resolution production files for physical stand structures, ensuring exact prepress accuracy for large-format print wraps, physical signage, and trade show displays.

EDUCATION

Bachelor's Degree in Industrial Design

Icesi University -2015

UX / Ui Design Professional Certificate

Coder House - 2021

LANGUAGES

English: B2.

Spanish: Native
